### **DETAILED ACTION**

1. This Office Action is in response to Amendments and Remarks received 29 June 2006. Per Applicant's request, claims 4, 7-9, and 12-22 have been canceled. New claims 24-36 have been added. Claims 24-36 are pending.

#### ***Claim Objections***

2. In view of canceled claim 11, the prior claim objection is hereby withdrawn.

#### ***Claim Rejections - 35 USC § 101***

3. In view of canceled claims 13-22, the prior 35 USC 101 rejection is hereby withdrawn.

#### ***Allowable Subject Matter***

4. Claims 24-36 (to be renumbered in order) are allowed.

5. The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 24 (and similarly worded in independent claim 30), as Applicant has noted on page 8, 1<sup>st</sup> paragraph, Freeman, Hanson, and other cited prior arts, taken alone or in combination, fail to disclose, "instantiating the multi-channel application for operation with the first type of registered device over the first channel by enabling selected ones of the workflow dimensions used by the application when operating with the first type of registered device over the first channel"... "continuing the transaction with the multi-channel application over a second channel by instantiating the multi-channel application for operation with the second type of registered device over the second channel by enabling other selected workflow dimensions used by the application when operating with the second type of registered device over the second channel," when taken in the context of the claims as a whole.

Art Unit: 2191

Moreover, evidence for modifying the prior art teachings by one of ordinary skill level in the art was not uncovered so as to result in the invention as recited.

Thus, all remaining dependent claims, claims 25-29 & 31-36 are allowed.

Note the following reference previously identified in the Office Action dated 4/5/2006.

US Patent 6,996,800 to Lucassen et al – disclosed at col. 20: 13-22 session persistence which may be resumed on another device or modality. Lucassen failed to disclose specific limitations of independent claims 24 and 30:

“a unique identifier associated with a user of the first type of device...associating the first type of device with the unique identifier such that the first type of device is designated a first type of registered device...storing session data...and associating the session data with the unique identifier... transmitting...a second request to continue...wherein the second request includes the unique identifier...presenting the user with an option to continue the transaction from a previous point of execution...”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
